How to correctly place the iron-on labels

- 1. Peel the label from its backing.
- 2. Place it on the clothing.
- 3. Cover with the baking paper, never iron the label directly.
- 4. Press with a hot, dry iron (no steam) for 20 seconds without moving it.
- 5. Let cool, then remove the paper and check.
- 6. If edges lift, repeat until fully bonded.

(A correct application will show the fabric's texture on the label.)
